Test Engineering Manager at L3Harris Technologies

The CBR test is a small scale penetration test in which a cylindrical plunger of 5 cm in diameter is used. Cross-section is penetrated into sub-grade material, at the rate of 0.05 in per minute i.e 1.25 mm/min. Observations are taken between the penetration resistance i.e. test load versus the penetration of plunger.

New Scientist magazine was launched in 1956 "for all those men and women who are interested in scientific discovery, and in its industrial, commercial and social consequences". The brand's mission is no different today - for its consumers, New Scientist reports, explores and interprets the results of human endeavour set in the context of society and culture.

Catalog of the most often requested AT&T documents.

In response to popular demand, Emmanuel Goldstein (aka, Eric Corley) presents a spectacular collection of the hacker culture, known as 2600: The Hacker Quarterly, from a firsthand perspective. Offering a behind-the-scenes vantage point, this book provides devoted fans of 2600 a compilation of fascinating—and controversial—articles. Cult author and hacker Emmanuel Goldstein has collected some of the strongest, most interesting, and often provocative articles that chronicle milestone events and technology changes that have occurred over the last 24 years. He divulges author names who were formerly only known as “ anonymous ” but have agreed to have their identity revealed. The accompanying CD-ROM features the best episodes of Goldstein ' s “ Off the Hook ” radio shows. Note: CD-ROM/DVD and other supplementary materials are not included as part of eBook file.
