One of the hallmarks of the Bittinger Developmental Math program is objective-based learning. In Elementary and Intermediate Algebra: Graphs and Models, Fifth Edition, the authors place special emphasis on conceptual understanding, modeling, and visualization. Their goal is to help students “ see the math ” and learn algebra by making connections between the math and real-world applications.

The Bittinger Worktext Series changed the face of developmental education with the introduction of objective-based worktexts that presented math one concept at a time. This approach allowed readers to understand the rationale behind each concept before practicing the associated skills and then moving on to the next topic. With this revision, Marv Bittinger continues to focus on building success through conceptual understanding, while also supporting readers with quality applications, exercises, and new review and study materials to help them apply and retain their knowledge.

For courses in Intermediate Algebra. Understanding and Applying Mathematical Concepts The goal of the Bittinger Concepts and Applications Series is to help today's student learn and retain mathematical concepts. This proven program prepares students for the transition from skills-oriented elementary algebra courses to more concept-oriented college-level mathematics courses. This requires the development of critical-thinking skills: to reason mathematically, to communicate mathematically, and to identify and solve mathematical problems. The new editions support students with a tightly integrated MyMathLab course; a strong focus on problem-solving, applications, and concepts, and the robust MyMathGuide workbook and objective-based video program. In addition, new material--developed as a result of the authors' experience in the classroom, as well as from insights from faculty and students--includes more systematic review and preparation for practice, as well as stronger focus on real-world applications. Also available with MyMathLab (tm) . MyMathLab is an online homework, tutorial, and assessment program designed to work with this text to engage students and improve results.
