This book argues that social business, in order to sustain its vital distinctiveness in democratic societies, must shift from an informative to a performative model of communication, especially regarding organizational storytelling, awareness-raising, and social problem-solving.

First multi-year cumulation covers six years: 1965-70.

Effective diagnostic and clinical management skills require competency in observing, listening, communicating, problem-solving and negotiating. In addition, the physician needs human relationship skills. It is apparent that a systematic curriculum is needed to teach these clinical skills to medical students and trainees and this handbook provides a practical guide. --
