Microeconomics: Case Studies and Applications contains case studies that explore core microeconomics concepts by focusing on current events in economics and providing a theory refresher for each section and questions. Designed to be a companion text to larger microeconomics texts, this resource offers a useful, time-saving alternative to sourcing online articles and journals. As a first-year text it teaches best-practice use of case studies and acts as a stepping stone for students who will source and use articles as they progress through their course. Each case study presents a different application of a core concept or theory. As well as the main text, which presents the application of the core concept, each case study contains a range of extra material. A "Theory refresher" section provides a quick way for students to revise a key concept or theory that is important for understanding the application in that case study.

Examine today's field of changing health behaviors as INTRODUCTION TO HEALTH PROMOTION & BEHAVIORAL SCIENCE IN PUBLIC HEALTH answers practical questions, such as how do you convince people to stop smoking? and how do you successfully promote physical activity? This comprehensive book, part of Cengage Learning's new PUBLIC HEALTH BASICS series, details the methods and theories used to address many of the top behaviors that contribute to early morbidity and mortality. You will gain a solid overview of the risk factors of communicable and non-communicable diseases as you examine health promotion programs designed to intervene and prevent these diseases. The book begins with a thorough, practical introduction to the principles and processes of program planning models. You review the most commonly used theories in health promotion and today's most current research and practices. The book assesses how various programs target differing levels of the socio-ecological model, including individual, interpersonal, organizational, and community levels. Numerous case studies showcase both influences on health behaviors and how programs at various levels of the socio-ecological model modify behaviors. You will evaluate how public health policy continues to address various health problems at all levels.
