Do you use the remote to control the Volume on your TV? (TV volume, not cable box volume?) I actually went to the online manual for the Philips 122 remote and it does not say anything on how to program the remote Video Source Button. Here is the manual in RTF format:

The Simple Guide to Home Electronics helps the average person navigate the bewildering array of choices in the ever-changing world of home electronics that impact our day to day lives. A wide variety of topics from lightbulbs to the Internet, TV, Telephone, Cameras, and the Internet of Things (IoT) are explained without all the tech savvy jargon. Each chapter begins with a general overview and practical advice followed by more in-depth information that will give you an understanding of the type of products available and how they work. If you have ever considered disconnecting your cable TV, a smart thermostat or turning on the lights with a voice activated product, then this book is for you. The author's light conversational style along with his own engaging stories, humor and points of view make these complex topics easy to understand. The information is presented in free-standing independent chapters that can referenced over and over again as you replace and update the technology in your home.

The fun and easy way to get up and running quickly with Microsoft Windows XP Media Center Edition, the new operating system version specially outfitted for TV, DVD, video, music, and digital photo applications Media Center PCs are the first PCs to feature an easy-to-use interface and all preconfigured hardware and preloaded software needed to create a complete integrated home entertainment system. Explains how to integrate a home computer network with a home theater system, control connected TVs with the Remote Control Interface, record TV programs using a TiVo-like recorder, acquire and play back music files, organize digital videos and photos, play DVD movies, and much more. Written by the authors of Home Theater For Dummies (0-7645-1801-1) and Wireless Home Networking For Dummies (0-7645-3910-8), who worked closely with Media Center Edition product management at Microsoft to complete the book.

The updated 11th edition of the Aeronautical Chart User's Guide by the FAA is a great reference for novice pilots and professionals alike. Printed in full color with detailed examples, this book provides all the information students and pilots need to know about all the symbols and information provided on US

aeronautical charts and chart navigation publications. Readers will find information on VFR charts, aeronautical chart symbols, helicopter route charts, flyway planning charts, IFR enroute charts, explanation of IFR enroute terms and symbols, Terminal Procedure Publications (TPPs), explanation of TPP terms and symbols, airspace classifications, and an airspace class table.

February issue includes Appendix entitled Directory of United States Government periodicals and subscription publications; September issue includes List of depository libraries; June and December issues include semiannual index

Ten Strategies of a World-Class Cyber Security Operations Center conveys MITRE's accumulated expertise on enterprise-grade computer network defense. It covers ten key qualities of leading Cyber Security Operations Centers (CSOCs), ranging from their structure and organization, to processes that best enable smooth operations, to approaches that extract maximum value from key CSOC technology investments. This book offers perspective and context for key decision points in structuring a CSOC, such as what capabilities to offer, how to architect large-scale data collection and analysis, and how to prepare the CSOC team for agile, threat-based response. If you manage, work in, or are standing up a CSOC, this book is for you. It is also available on MITRE's website, www.mitre.org.

This book constitutes the thoroughly refereed post-proceedings of the IFIP-TC6 6th Annual International Working Conference on Active Networks, IWAN 2004, held in Lawrence, KS, USA in October 2004. The 14 revised full papers presented together with one invited paper are organized in topical sections on active networking systems, active networking security, active networking applications, mobile active networks, and active networking management.
