Partly new – and completely groundbreaking. China's pledge to reach peak carbon emissions by 2030 is not new but has been submitted as part of its unconditional Nationally Determined Contributions (NDCs), as China ratified the Paris Agreement back in 2016. In his recent speech, this pledge remains essentially the same: President Xi states that China's emissions will peak "before 2030 ...

Two rascals sell a vain Chinese emperor an invisible suit of clothes.

Ming Da is only nine years old when he becomes the emperor of China, and his three advisors take advantage of him by stealing his stores of rice, gold, and precious stones. But Ming Da has a plan. With the help of his tailors, he comes up with a clever idea to outsmart his devious advisors: He asks his tailors to make "magical" new clothes for him. Anyone who is honest, the young emperor explains, will see the clothes' true splendor, but anyone who is dishonest will see only burlap sacks. The emperor dons a burlap sack, and the ministers can't help but fall for his cunning trick.

There was once an emperor who was only interested in one thing, his clothes. He spent all his money on his outfits and had a different one for every time of day and every occasion. One day, two thieves arrived in town pretending to be weavers who knew how to make the most beautiful and sophisticated fabrics, which had the marvellous property of only being visible to those who did their job well.. It was the perfect offer for our king, who immediately placed an order. Hans Christian Andersen (1805-1875) was a Danish author, poet and artist. Celebrated for children's literature, his most cherished fairy tales include "The Emperor's New Clothes", "The Little Mermaid", "The Nightingale", "The Steadfast Tin Soldier", "The Snow Queen", "The Ugly Duckling" and "The Little Match Girl". His books have been translated into every living language, and today there is no child or adult that has not met Andersen's whimsical characters. His fairy tales have been adapted to stage and screen countless times, most notably by Disney with the animated films "The Little Mermaid" in 1989 and "Frozen", which is loosely based on "The Snow Queen", in 2013. A prominent authority on China's Belt and Road Initiative reveals the global risks lurking within Beijing's project of the century China's Belt and Road Initiative is the world's most ambitious and misunderstood geoeconomic vision. To carry out President Xi Jinping's flagship foreign-policy effort, China promises to spend over one trillion dollars for new ports, railways, fiber-optic cables, power plants, and other connections. The plan touches more than one hundred and thirty countries and has expanded into the Arctic, cyberspace, and even outer space. Beijing says that it is promoting global development, but Washington warns that it is charting a path to global dominance. Taking readers on a journey to China's projects in Asia, Europe, and Africa, Jonathan E. Hillman reveals how this grand vision is unfolding. As China pushes beyond its borders and deep into dangerous territory, it is repeating the mistakes of the great powers that came before it, Hillman argues. If China succeeds, it will remake the world and place itself at the center of everything. But Xi may be overreaching: all roads do not yet lead to Beijing.

In this action-packed adventure and coming-of-age story that finely weaves fact and fiction, thirteen-year-old Ming lives in a small village in Maoist China in the 1970s. His father is convinced that Emperor Qin's tomb—and the life-size terra-cotta army created to serve and protect the emperor in the afterlife—lies hidden in the hills around them. But if Ming's father doesn't prove it soon, the town's Political Officer will condemn him to the brutal labor camps. From the stories of a terra-cotta soldier who has survived through the centuries, Ming learns the history of Emperor Qin, known for building the Great Wall of China, and how and why the terra-cotta soldiers came to be. As their unlikely friendship develops, Ming experiences the mysterious tomb firsthand, braving deadly traps and witnessing the terra-cotta army in action. Most importantly, he comes to see how he can save both the terra-cotta soldiers and his father from the corrupt Political Officer and his Communist cronies. The book is illustrated with photographs of Communist Chinese village life in the 1970s, the Great Wall, and, of course, the excavated tomb with its many terra-cotta soldiers. It also features a special recipe from the story. Praise for *Secrets of the Terra-Cotta Soldier* "Historical photos and Indiana Jones-style adventure enrich this tale of an unusual meeting between the Qin Dynasty and the 20th century." --Kirkus Reviews "Despite the hardships, both courageous characters work to uphold their respective duties: Shi to protect the tomb and Ming to protect the cultural legacy of China's people.
