"The Margins of Philosophy" is an interesting work by this academically controversial author. Generally speaking--and what more can one do in a review--Derrida's readings are heavily influenced by Heidegger's statement that what an author keeps silent is as important as what he states.

First published in 1967, *Writing and Difference*, a collection of Jacques Derrida's essays written between 1959 and 1966, has become a landmark of contemporary French thought. In it we find Derrida at work on his systematic deconstruction of Western metaphysics. The book's first half, which includes the celebrated essay on Descartes and Foucault, shows the development of Derrida's method of deconstruction. In these essays, Derrida demonstrates the traditional nature of some purportedly nontraditional currents of modern thought—one of his main targets being the way in which "structuralism" unwittingly repeats metaphysical concepts in its use of linguistic models. The second half of the book

contains some of Derrida's most compelling analyses of why and how metaphysical thinking must exclude writing from its conception of language, finally showing metaphysics to be constituted by this exclusion. These essays on Artaud, Freud, Bataille, Hegel, and Lévi-Strauss have served as introductions to Derrida's notions of writing and différence—the untranslatable formulation of a nonmetaphysical "concept" that does not exclude writing—for almost a generation of students of literature, philosophy, and psychoanalysis. *Writing and Difference* reveals the unacknowledged program that makes thought itself possible. In analyzing the contradictions inherent in this program, Derrida goes on to develop new ways of thinking, reading, and writing,—new ways based on the

most complete and rigorous understanding of the old ways. Scholars and students from all disciplines will find *Writing and Difference* an excellent introduction to perhaps the most challenging of contemporary French thinkers—challenging because Derrida questions thought as we know it.

One of the most influential and controversial thinkers of the twentieth-century, Jacques Derrida ' s ideas on deconstruction have had a lasting impact on philosophy, literature and cultural studies. *Jacques Derrida: Basic Writings* is the first anthology to present his most important philosophical writings and is an indispensable resource for all students and readers of his work. Barry Stocker ' s clear

The selections themselves range from his most infamous works including Speech and Phenomena and Writing and Difference to lesser known discussion on aesthetics, ethics and politics.

"The English version of Dissemination [is] an able translation by Barbara Johnson Derrida's central contention is that language is haunted by dispersal, absence, loss, the risk of unmeaning, a risk which is starkly embodied in all writing. The distinction between philosophy and literature therefore becomes of secondary importance. Philosophy vainly attempts to control the irrecoverable dissemination of its

own meaning, it strives—against the grain of language—to offer a sober revelation of truth. Literature—on the other hand—flaunts its own meretriciousness, abandons itself to the Dionysiac play of language. In Dissemination—more than any previous work—Derrida joins in the revelry, weaving a complex pattern of puns, verbal echoes and allusions, intended to 'deconstruct' both the pretension of criticism to tell the truth about literature, and the pretension of philosophy to the literature of truth."—Peter Dews, New Statesman
