There is currently a debate in the Kingdom of Saudi Arabia is over how directors of publicly held companies can be held accountable. Before addressing this question, we should determine when it is that a director violates her or his duties. This study seeks to bring focus to the accountability system in Saudi Arabia. It investigates a legal defect in that system: the Saudi Companies Law incorporates standards of conduct but lacks standards of review. This study argues that although directors' duties have been formulated so that there are areas left to be developed by courts, Saudi judges do not retain residual lawmaking powers which they could use to fill a regulatory vacuum. It builds upon empirical evidence to prove the underlying reasons that the context has changed, which ultimately has created the need to reform the Saudi fiduciary duties system. New cases in Saudi Arabia evoke some of the contours of Delaware corporate law. New cases have triggered standards of conduct violations that might be identical to fiduciary violations in Delaware. Therefore, this study proposes to transplant Delaware standards of review to Saudi Arabia. It argues that the contextual change in Saudi Arabia after the establishment of the Capital Market Authority would make this transplant more significant. Closer analysis suggests that both systems are consensus on the shareholder primacy model. This convergence on the shareholder model inevitably ensures a functional convergence in the long run.

Mergers, Acquisitions, and Other Restructuring Activities: An Integrated Approach to Process, Tools, Cases, and Solutions, Ninth Edition, is the most current, comprehensive and cutting-edge text on M&A and corporate restructuring available. It includes many of the most up-to-date and notable deals and precedent setting judicial decisions, as well as new regulations, trends and tactics employed in M&As. The implications of recent developments such as negative interest rates on valuation and the backlash against globalization for cross-border M&As are discussed. More than 90% of the case studies are new for this edition, involving deals either announced or completed during the last several years. It is comprehensive in that nearly all aspects of M&As and corporate restructuring are explored from business plan development to target selection and valuation to negotiation and post-merger integration. It is cutting edge in that conclusions and insights are anchored by the most recent academic research, with references to more than 160 empirical studies published in leading peer-reviewed journals just since the release of the last edition in 2015. Teaches about the financial, legal, accounting and strategic elements of mergers and acquisitions by concentrating on the ways their agents interact Emphasizes current events and trends through new and updated cases Highlights international mergers and acquisitions activities

This book describes and assesses an emerging threat to states' territorial control and sovereignty: the hostile control of companies that carry out privatized aspects of sovereign authority. The threat arises from the massive worldwide shift of state activities to the private sector since the late 1970s in conjunction with two other modern trends – the globalization of business and the liberalization of international capital flows. The work introduces three new concepts: firstly, the rise of companies that handle privatized activities, and the associated advent of "post-government companies" that make such activities their core business. Control of them may reside with individual investors, other companies or investment funds, or it may reside with other states through state-owned enterprises or sovereign wealth funds. Secondly, "imperfect privatizations": when a state privatizes an activity to another state's public sector. The book identifies cases where this is happening. It also elaborates on how ownership and influence of companies that perform privatized functions may not be transparent, and can pass to inherently hostile actors, including criminal or terrorist organizations. Thirdly, "belligerent companies," whose conduct is hostile to those of states where they are active. The book concludes by assessing the adequacy of existing legal and regulatory regimes and how relevant norms may evolve.

1.1 Cash Flow, Risk, Agency, Information, Investments The first volume dealt with the management of: cash flow (and the exchange of goods and services); risk; agency relationships; and information. The firm manages these aspects by legal tools and practices in the context of all commercial transactions. The second volume discussed investments. As voluntary contracts belong to the most important legal tools available to the firm, the second volume provided an introduction to the general legal aspects of generic investment contracts and payment obligations. This volume discusses funding transactions, exit, and a particular category of decisions raising existential questions (business acquisitions). Transactions which can be regarded as funding transactions from the perspective of a firm raising the funding can be regarded as investment transactions from the perspective of an investor that provides the funding. Although the perspective chosen in this volume is that of a firm raising funding, this volume will simultaneously provide information about the legal aspects of many investment transactions. 1.2 Funding, Exit, Acquisitions Funding transactions are obviously an important way to manage cash flow. All investments will have to be funded in some way or another. The firm's funding mix will also influence risk in many ways. Funding. The most important way to raise funding is through retained profits and by using existing assets more efficiently. The firm can also borrow money from a bank, or issue debt, equity, or mezzanine securities to a small group of investors.
