Ranging from the ancient wisdom of Confucius and Plato to today ’ s cutting-edge thinkers, it offers a wealth of stimulation and amusement for everyone with a curious mind. Within the pages of this book you will find a wide variety of answers to the great, eternal questions: How was the universe created and what is the place of humans within it? How should a person live? And how can we build a just society? *1001 Ideas That Changed the Way We Think* also includes a host of hypotheses that are remarkable for their sheer weirdness—from the concept of the transmigration of souls to parallel universes and the theoretical paradoxes of time travel (what happens if you travel back in time and kill your own grandfather?). Discover how the Greek philosopher Zeno “ proved ” a flying arrow never moves; how modern science has shown that a butterfly ’ s wing can stir up an Atlantic storm; and the mathematical proof of the existence of life in other galaxies. The inspirational ideas explored here range from Gandhi ’ s theory of civil disobedience to Henry David Thoreau ’ s praise of the simple life and Mary Wollstonecraft ’ s groundbreaking advocacy of women ’ s rights. The book also covers a wide variety of lifestyle concepts, such as “ rational dress ” and naturism, and cultural movements including Neoclassicism, Surrealism, and Postmodernism. Supported by a wealth of striking illustrations and illuminating quotations, *1001 Ideas That Changed the Way We Think* is both an in-depth history of ideas and a delightfully browsable source of entertainment.

"Imagine it is the seventh century. As most of Europe continues its descent into a long period of intellectually dormancy, a quiet yet powerful academic revolution is erupting in another corner of the world. Over the next centuries, the geniuses of Muslim society will thrust the boundaries of knowledge forward to such a degree that their innovations still shape civilizations to this day. The staggering achievements of these men and women influenced the development of modern mathematics, science, engineering, and medicine. *1001 Inventions: The Enduring Legacy of Muslim Civilization* sheds new light on this golden era that was once lost to so many, and celebrates the heritage that we all share"--P. [4] of cover.

Traces centuries of invention and technological innovation in the Muslim world, revealing how Muslim intellectuals built elephant water clocks, drew detailed world maps, and built colossal architectural structures.

One teenager in a skirt. One teenager with a lighter. One moment that changes both of their lives forever. If it weren't for the 57 bus, Sasha and Richard never would have met. Both were high school students from Oakland, California, one of the most diverse cities in the country, but they inhabited different worlds. Sasha, a white teen, lived in the middle-class foothills and attended a small private school. Richard, a black teen, lived in the crime-plagued flatlands and attended a large public one. Each day, their paths overlapped for a mere eight minutes. But one afternoon on the bus ride home from school, a single reckless act left Sasha severely burned, and Richard charged with two hate crimes and facing life imprisonment. The 57 Bus is Dashka Slater's true account of the case that garnered international attention and thrust both teenagers into the spotlight.

“ Agatha Christie ’ s indelibly etched characters have entertained millions across the years and a love of her work has brought together generations of readers—a singular achievement for any author and an inspiration to writers across the literary landscape. ” —Jacqueline Winspear, New York Times bestselling author of the Maisie Dobbs novels In this official edition featuring exclusive content from the Queen of Mystery, Hercule Poirot comes out of retirement in one of Agatha Christie ’ s ten favorite novels, which was also voted by the British Crime Writers ’ Association as the “ Best Crime Novel of all Time. ” Roger Ackroyd knew too much.
