About. Ahmed Ali A. Mohamed (El-Tallawy) is an Associate Professor of Electrical Engineering (EE) at the City College of the City University of New York (CUNY).

This book provides a comprehensive analysis of Waqf management and its impact on socio-economic development, specifically financial inclusion and sustainable development as well as of the legal issues in Waqf management in IsDB member countries and jurisdictions. It explores various aspects of Waqf management in IsDB member countries/jurisdictions as well as in non-Muslim majority countries such as Waqf regulation, its modernization, and relationship to Maqasid Al-Shari'ah; performance of Waqf activities; time and activity-wise distribution of Waqf resource management; the antecedents and consequences of Waqf assets (both physical and cash); the strategies and models to promote Waqf related activities for greater socio-economic development; good governance practices through the formulation of informed policies for Waqf projects,

among others. Comprising different issues and perspectives adopted by various researchers, the work is specifically designed to meet the needs of academics and industry practitioners in the field of Islamic finance.

The American Journal of Islamic Social Sciences (AJISS) is a double blind peer-reviewed and interdisciplinary journal that publishes a wide variety of scholarly research on all facets of Islam and the Muslim world: anthropology, economics, history, philosophy and metaphysics, politics, psychology, religious law, and traditional Islam. Submissions are subject to a blind peer review process.

Monopoly is one of the topics under market structure in microeconomic theory. Comparatively, based on conventional economics, monopoly is the third best solution in economics because under its operational theories it can create Dead Weight Loss (DWL) to the society in term of increasing price and reduce quantity of product in order to increase monopoly profit and reduce the consumer surplus. However in my book of Industrial Economics: Monopoly in Islamic Perspective shown that monopoly power under control of Islamic man it will create more social benefit rather DWL. For example ZAM-ZAM water in Mecca Saudi Arabia is a natural monopoly the only one in the world, but King of Saudi Arabia he is an Islamic Man in this regard he can freely supply ZAM-ZAM water to the people all over the world. Nonetheless, if he is an economic man (Characters of selfish and opportunist and main motive of profit maximization) he can put the price of the only natural monopoly to the people based on his own greediness and monopoly power. To see the Islamic Ethic, Morality and Altruism as well as characters of Islamic Man, under monopoly power, although he/she is a monopolist it still could give benefit to society at large. In this regard, please refer to the above book for your additional knowledge in the field of discipline.

With the ongoing restructuring in Sudan, structural issues such as the

# Read PDF Prof Dr Mohamed Ahmed Hassan Heikal

need for skill development and interaction with technological change need an in-depth analysis that this book offers. The central themes of this book are- required skill formation, upskilling of the workers, and their interaction with technological change in lieu of a deficient educational system and its implications. An empirical investigation of the causes and consequences of low skill and technology indicators using a primary survey at macro and micro levels is undertaken. This is followed by an examination of the interaction between the low skill and technology indicators, the relationships between skill, upskilling and technology indicators, skills mismatch, the uses and impacts of ICT and differences at firm as well as industry level as well as knowledge transfer effects. A set of recommendations towards the need for implementation of consistent policies, increasing incentives and collaboration between public and private institutions completes the book.

This book examines the intersection between contemporary International Commercial Arbitration and Shari'a law in order to determine possible tensions that may arise between the two systems. It develops evidentiary and procedural rules under Shari'a, as well as examining the consequences of stipulating qualifications of arbitrators based on gender and/or religion. The author extensively analyses the prohibition against interest (riba) and uncertainty (gharar) under Shari'a and its impact on arbitration agreements, arbitral awards and public policy. The book also explores the prohibition against riba in light of international conventions, such as the United Nations Convention on Contracts for the International Sale of Goods. Case studies in the book include the Asian International Arbitration Centre, formerly the Kuala Lumpur Regional Centre for Arbitration, and the International Islamic Centre for Reconciliation and Arbitration, as well as the ' Shari ' a Standards ' developed by the Accounting and Auditing Organization for Islamic Financial Institutions. The book will be a valuable resource for academics, students and practitioners working in the areas of Islamic law and the Islamic finance industry.

This work of Kamal begins with archaeologists who were faced by a whole kingdom of Kush revealing itself before them in a fantasy that transcends history itself where time and ages overlap and intertwine and where personalities that lived centuries ago meet and enter into a dialogue where the author expresses and show a number of human values taking advantage from his abundant wealth of historical and archaeological knowledge.

"The African Yearbook of International Law" provides an intellectual forum for the systematic analysis and scientific dissection of issues of international law as they apply to Africa, as well as Africa's contribution to the progressive development of international law. It contributes to the promotion, acceptance of and respect for the principles of international law, as well as to the encouragement of the teaching, study, dissemination and wider appreciation of international law in Africa. A clear articulation of Africa's views on the various aspects of international law based on the present realities of the continent as well as on Africa's civilization, culture, philosophy and history will undoubtedly contribute to a better understanding among nations. "The African Yearbook of International Law" plays an important role in examining the tensions underlying the State in Africa, and by shedding more light on the causes of the fragility of African state institutions so as to facilitate the identification of appropriate remedies. The tension and interrelationships among issues such as territorial integrity, self determination, ethnic diversity and nation-building are constantly addressed. Development, human rights and democratization in Africa are also subject of continuous attention and examination.

# Read PDF Prof Dr Mohamed Ahmed Hassan Heikal

humanitarian law applicable in international and non-international armed conflicts. In the absence of ratifications of important treaties in this area, this is clearly a publication of major importance, carried out at the express request of the international community. In so doing, this study identifies the common core of international humanitarian law binding on all parties to all armed conflicts.
