Explains what the scientific method is and gives step-by-step directions for more than 50 projects and experiments using everyday items, for everyone from beginners to advanced students.

Get kids interested in science while making toys and doing magic tricks with the unique experiments in this book. Make a "genie" in a bottle, a flame that jumps, a toy electric motor, and more. Readers will learn chemistry and physics while having fun. Many experiments include high-interest ideas to get young people involved in science fairs. Students can ace their next science project or test using magic and toys.

Uh-oh, now you've gone and done it, you volunteered to do a science fair project. Don't sweat it, presenting at a science fair can be a lot of fun. Just remember, the science fair is for your benefit. It's your chance to show that you understand the scientific method and how to apply it. Also, it's an opportunity for you to delve more deeply into a topic you're interested in. Quite a few scientists, including a few Nobel laureates, claim that they had their first major breakthrough while researching a science fair project. And besides, a good science fair project can open a lot of doors academically and professionally—but you already knew that. Stuck on what to do for your science project? This easy-to-follow guide is chock-full of more than 50 fun ideas and experiments in everything from astronomy to zoology. Your ultimate guide to creating crowd-pleasing displays, it shows you everything you need to know to: Choose the best project idea for you Make sure your project idea is safe, affordable, and doable Research, take notes, and organize your facts Write a clear informative research paper Design and execute your projects Ace the presentation and wow the judges Science fair guru Maxine Levaren gives walks you step-by-step through every phase of choosing, designing, assembling and presenting a blue ribbon science fair project. She gives you the inside scoop on what the judges are really looking for and coaches you on all the dos and don'ts of science fairs. And she arms you with in-depth coverage of more than 50 winning projects, including: Projects involving experiments in virtually every scientific disciplines Computer projects that develop programs to solve a particular problem or analyze system performance Engineering projects that design and build new devices or test existing devices to compare and analyze performance Research projects involving data collection and mathematical analysis of results Your complete guide to doing memorable science projects and having fun in the process, Science Fair Projects For Dummies is a science fair survival guide for budding scientists at every grade level.

More than twenty "green" science fair projects.

Presents step-by-step instructions for one hundred proven science projects that use everyday supplies and cover a wide range of topics. Reprint.

Volcanoes, mountains, and earthquakes! Fossils, glaciers, and crystals! Earth science has so many fun topics to explore, and this book is the best place to start understanding geology. Young scientists will learn about the Earth's layers, understand the forces that change our planet's surface, and explore how rocks, minerals, and crystals form. For students interested in competing in science fairs, the book contains lots of great suggestions and ideas for further experiments.

Presents more than twenty great experiments--broken into topics such as blood and guts, eyewitness accounts, and physical evidence--that allow students to use real CSI techniques to find clues, analyze the data, and come to their own conclusions.

The articles explore all aspects of getting ready for a science fair. You'll learn how to help students pick their projects, understand what makes for fair judging, and create innovative alternatives. Highly practical and wide-ranging, Science Fairs may be the only guide you'll ever need to run successful fairs at your school.

Presents projects and experiments covering chemical principles in sciences such as geology, electronics, environmental science, and health, with dozens of ideas for science fair chemistry projects.

Design and build your own robots, RC cars, motors, and more with these prize-winning science fair ideas!
