The original guide to creating wealth! With this seminal book, Wallace Wattles popularized the Law of Attraction, the powerful concept that inspired *The Secret*. *The Science of Getting Rich* explains how to attract wealth, overcome emotional barriers, and apply foolproof methods to bring financial success into your life. This special 100-year edition contains the complete, original text, along with never-before published biographical information on Wattles, and a foreword by Catherine Ponder, the doyenne of modern prosperity writers. It also features an introduction from personal development authority Tom Butler-Bowdon, plus another Wattles classic, *The Science of Being Great*.

One prominent function of natural language is to convey information. One peculiarity is that it does not do so randomly, but in a structured way, with information structuring formally recognized to be a component of grammar. Among all information structuring notions, focus is one primitive needed to account for all phenomena. *Focus Manifestation in Mandarin Chinese and Cantonese: A Comparative Perspective* aims to examine from a semantic perspective how syntactic structures and focus adverbs in Mandarin Chinese and semantic particles in Cantonese conspire to encode focus structures and determine focus manifestation in Chinese. With both as tonal languages, Mandarin Chinese and Cantonese manifest different morpho-syntactic configurations to mark focus. A general principle governing focus marking in Mandarin Chinese and Cantonese is given in the book, which aims to give a better understanding on the underlying principles the two used to mark additive and restrictive meanings, and related focus interpretations. Particular attention is also drawn to the co-occurrence of multiple forms of restrictive and additive particles in Cantonese, including adverbs, verbal suffixes and sentence-final particles. Linearity has shown to be an important parameter to determine how focus is structured in Cantonese. This book is aimed at advanced graduate students, researchers and scholars working on Chinese linguistics, syntax and semantics, and comparative dialectal grammar.
